Background

Demonstration of Simple Tcl/Tk (excluding NAP)
Data Models
Terminology
Grids
References

Installation

Installing Tcl/Tk and NAP
Sample Startup Scripts

Basics

Sample session
NAOs, OOCs and nap Command
Arguments of nap Command
Data Types
Array Processing

NAP Expressions

Syntax
Constants
Operators
Indexing
Built-in Functions

NAP Commands other than nap

Object-Oriented Commands (OOCs)
Reading Files using nap_get Command
nap_info command

nap_land_flag command

Defining New NAP Commands and Functions

Writing Procedures to be called as Commands or Functions
Interfacing NAP to a DLL based on C or Fortran Code

NAP Library of Tcl code

Tcl Procedures called as NAP Functions Functions for Dates and Times

Statistical Functions

Geographic Functions

Miscellaneous Functions

Tcl Procedures called as Commands Procedures for Dates and Times

Binary Input/Output Procedures

Geographic Procedures

Map Projection Procedures

Tk GUI Procedures CAPS/NAP Menu

choose_file GUI

HDF/netCDF Browser

Visualisation using procedure plot_nao

NAP Internal Details

N-dimensional Array Objects (NAOs)

NAP Photo Image Format

Demonstrations of NAP

Introduction to Demonstrations of NAP

Simple NAP

Constants

Arithmetic

OOs (Object-Oriented Commands)

Built-in Functions

Constructing Arrays

Indexing

Linear Algebra

Input/Output

Defining NAP Functions

Statistics
